

Distributed Teamwork

Application Thought Starters

Distributed Teamwork

As people travel less and work remotely more, video conferencing is a great way to make the meeting experience feel more like being in person. Here are some application ideas on how to design a space that helps break down the distance barrier.

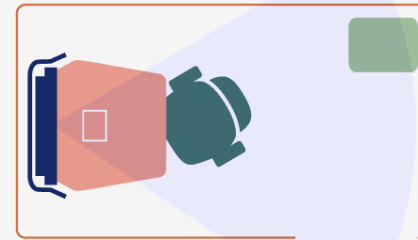

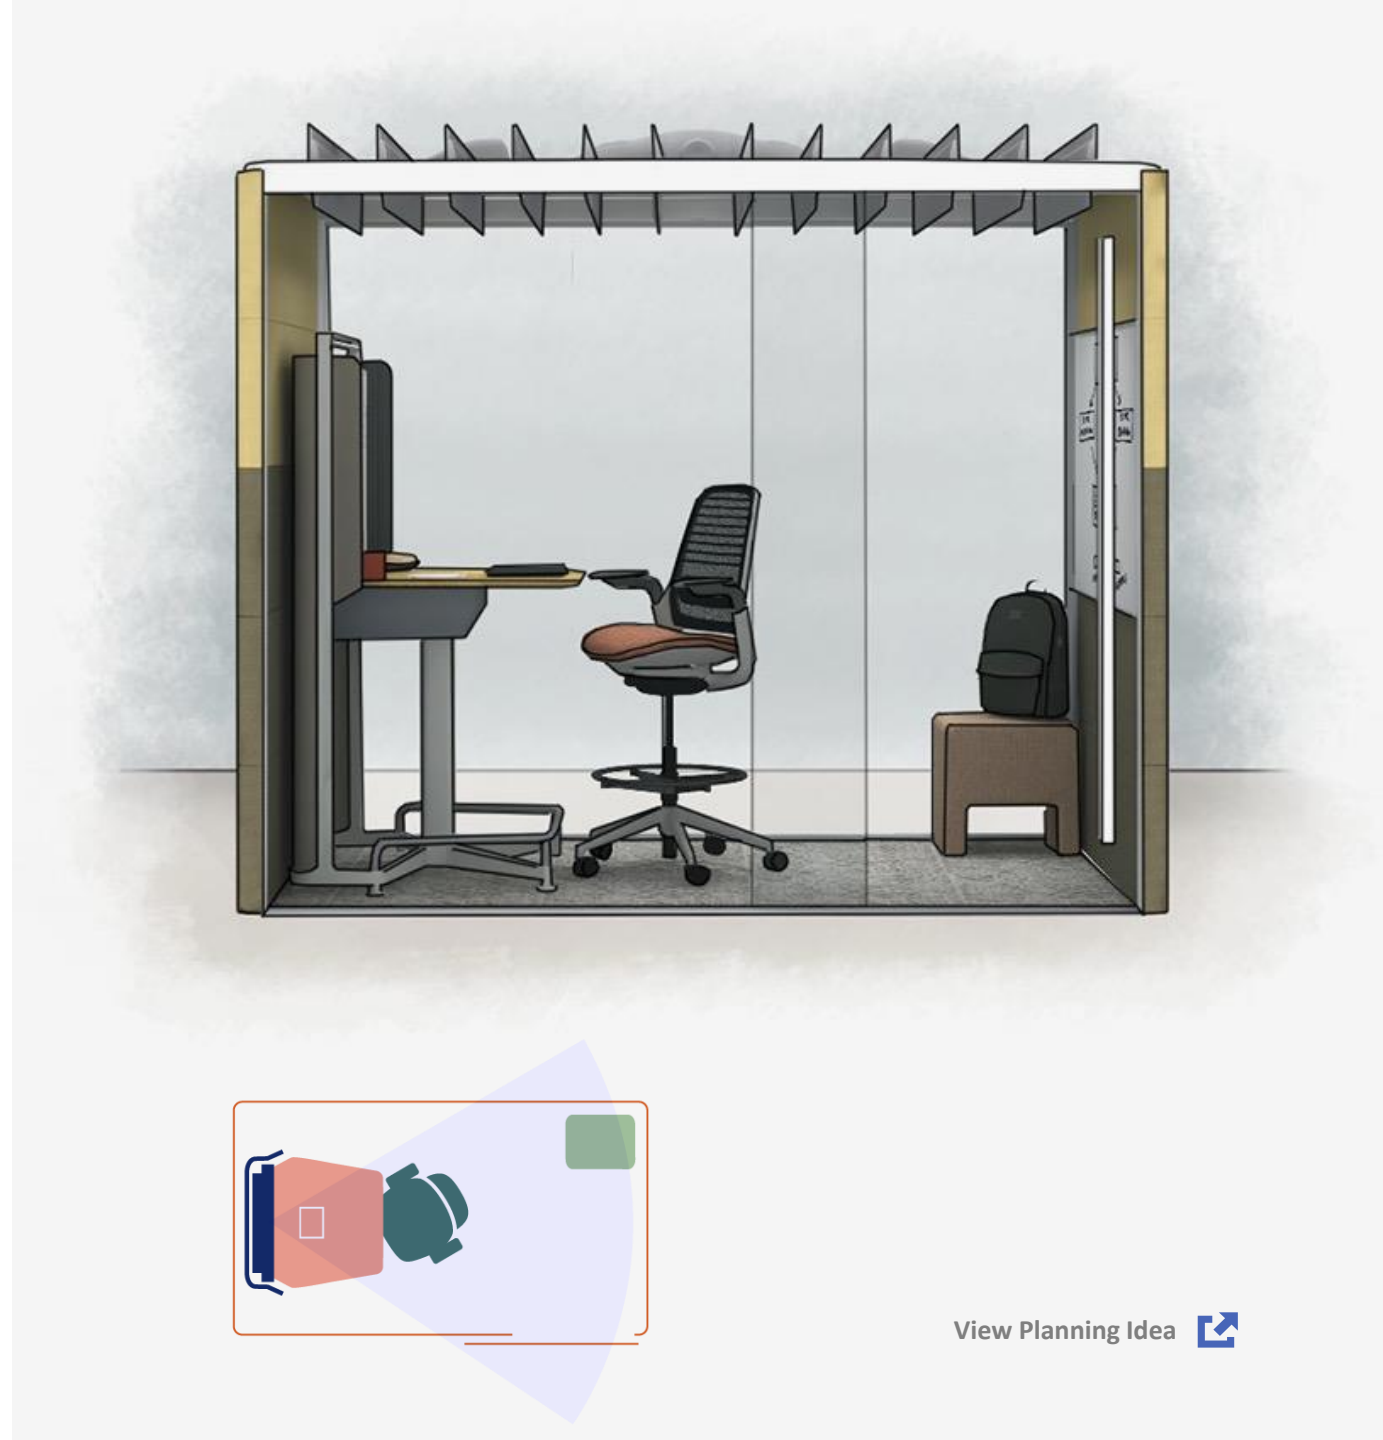

Stool Height media:scape Kiosk

Connect one-on-one with distributed team members without disturbing others nearby in an Orangebox pod with media:scape kiosk. Monitor allows eye-to-eye communication and standing-height stool encourages movement.

Key Products

- Orangebox Air-23 Pod
- Steelcase media:scape Kiosk
- Steelcase Series 1 Stool
- Coalesse Davos Bench

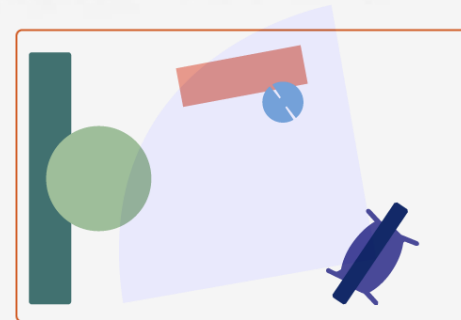

Active Collaboration

Remote teams can co-create content using the mobile Microsoft Surface Hub 2S on the Roam cart, which can be moved in or out of this Orangebox pod designed for ideation. Standing posture encourages people to move and interact.

Key Products

- Orangebox Air-27 Pod
- Orangebox Border
- Steelcase B-Free Beam
- Steelcase Flex Stand
- Microsoft Surface Hub 2S with Steelcase Roam Mobile Stand

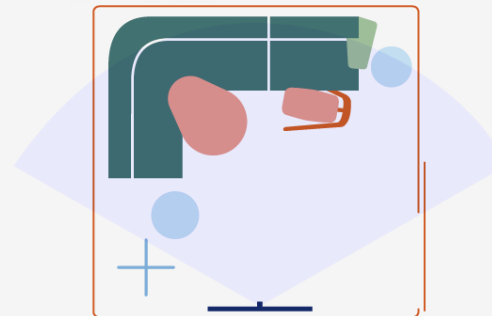

Lounge Collaboration

The monitor height and camera placement make it possible for everyone in this casual setting to be seen and allow eye-to-eye contact. The upholstered Orangebox walls and rug provide additional acoustic absorption.

Key Products

- Orangebox Air-25 Pod
- Orangebox Away from the Desk
- Coalesse Freestand Table
- Moooi Crystal Brown Rug
- Viccarbe Burin Table
- Blu Dot Bumper Ottoman
- Blu Dot Splash Coat Rack

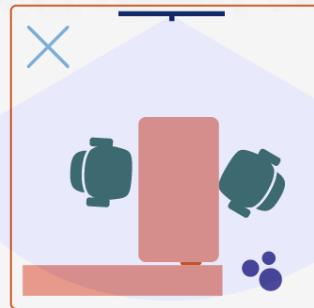

Private Office Wormhole

Work in pairs or easily transition from focused work to collaborative work with remote team members. The space can also be used as a wormhole where remote teams can virtually sit together and work side-by-side.

Key Products

- Orangebox Air-25 Pod
- Steelcase Mackinac Desk System
- Steelcase SILQ Chairs
- Blu Dot Splash Coat Rack

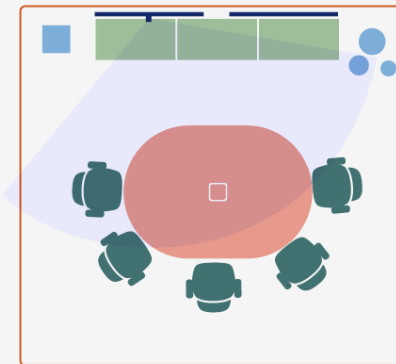

Stool Height Conference

Reserve this team space for intensive project sprints. Remote teams can use analog and digital tools for generative. Whiteboards placed behind users allow them to share analog content over high definition video conferencing.

Key Products

- Orangebox Air-29 Pod
- Steelcase media:scape Table
- Steelcase SILQ Stools
- Steelcase Elective Elements Storage
- Viccarbe Window Coat Rack

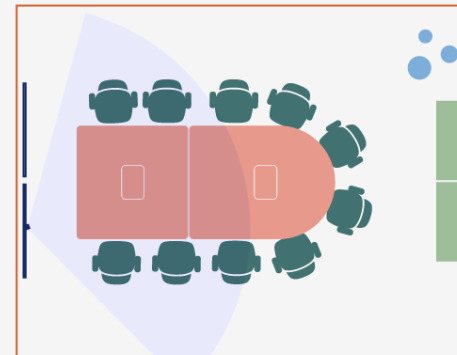

Traditional Large Conference

All team members can contribute equally around the D-shaped table, which allows everyone in the room to see and be seen by remote team members. Two monitors provide a surface for content sharing and video simultaneously.

Key Products

- Steelcase V.I.A. Walls
- Steelcase media:scape Table
- Steelcase Gesture Chairs
- Steelcase Elective Elements Wall-Mounted Storage
- Coalesse Davos Bench

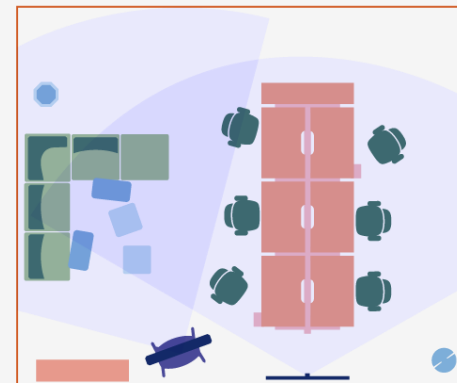

TeamStudio Wormhole

TeamStudio provides users with several analog and digital surfaces for sharing content, brainstorming and ideation. Remote team members can work side-by-side with the team using the mobile Microsoft Surface Hub 2S and Roam cart.

Key Products

- Steelcase V.I.A. Walls
- Turnstone Bivi Bench
- Steelcase Series 1 Chairs
- Microsoft Surface Hub 2S with Steelcase Roam Mobile Stand
- Steelcase B-Free Lounge System
- Coalesse Lagunitas Personal Table
- Turnstone Bivi Depot Storage
- Blu Dot Amos Coat Rack
