Orange Park Mall
Food Court Patio

**WASHINGTON
PRIME GROUP®**

orange park mall | food court patio | location

orange park mall | food court patio | considerations

- \$25K furniture budget
- this layout will include an L shape soft seating area bordering a fire pit, with another cushioned bench across from one of the sides
- the black chairs pictured will be sourced from an online retailer, LOTH will not spec those

With modular components that can be reassembled like toy bricks, the LEGO series was designed to be creatively versatile and fit for small spaces.

The sofa has wide armrests that can be used as a pillow when lying down, but also removed to reveal a built-in wooden table whose placement can be changed by adjusting the cushions.

Crafted in weatherproof material that is both durable and easily maintained, the sofa is suitable for both indoor and outdoor use

General Care and Maintenance Guidelines

- Cover and/or store inside during winter months, harsh weather conditions (e.g. snow, ice, heavy rain, etc.) or long periods of non-use.
- For chairs, do not stack more than 5 chairs per stack.
- For bases, do not exceed the recommended table top size and load capacity. Do not move tables by pushing them, the force may cause bases to loosen, warp, or break.

Real teak

- Our teak is finely sanded in its natural form, and not treated with teak sealer or oil. In its natural form, teak will naturally weather and age, causing the color to turn from gold-honey to a silvergray tone, which is the desired effect for many people. The change in color does not indicate deterioration in the wood.
- Clean on an as needed basis with mild soap and water solution. Clean thoroughly twice per year with teak cleaner. Do not pressure wash. To remove persistent stains and scratches mild sanding may be required. Occasional sanding may also be required to remove raised grain and restore the smooth finish after prolonged use. Contact the manufacturer prior to sanding

Faux Teak

- Faux teak is low maintenance, splinter-free, and resistant to rot, insects and weather.
- Page 4 of 5 Revised 18APR2019
- Clean regularly with mild soap and water solution with a soft rag.
 - Do not use abrasive materials, cleaners, bleach products, chemicals and products meant for real teak.
 - Do not place hot plates, cups, pans, etc. directly on the faux teak.

Aluminum

- Aluminum is a strong, non-rusting material making it ideal for outdoor use.
- Clean regularly with mild soap and water solution.
- Inspect frames and bases at least once per month for cracks, loose screws, missing or worn out glides, and other deviations.

Sunbrella®

All Sunbrella® fabrics are engineered to combine the highest level of design and performance. Standard Sunbrella fabrics that we use are water-resistant, but not waterproof. For easy day-to-day maintenance of your Sunbrella fabric, please do the following:

- Brush off loose dirt.
- Spray on a cleaning solution of water and mild soap.
- Use a soft bristle brush to clean.
- Allow cleaning solution to soak into the fabric.
- Rinse thoroughly until all soap residue is removed.
- Air dry. For detailed cleaning instructions and stain removal instructions, please visit:
