

Cleaning and Maintenance Guide

Laminate Surfaces

Spot clean with a soft cloth using non-abrasive, water-based cleaners such as Simple Green (diluted per instructions), Windex, or Fantastik.

- Use a mixture of baking soda and water for hard-to-clean areas and darker laminates with streaking issues.
 - To clean Black FENIX® laminate, use a Magic Eraser dipped in warm water. Rub in circles then dry with a clean, non-abrasive cloth.
- To clean off adhesives, use a clean cloth damp with nail polish remover. Wipe clean with a separate cloth damp with water.
- Markerboard laminate should be cleaned with a clean, non-abrasive, damp cloth. A mild soap/water solution or liquid detergent can be used.

Veneer Surfaces

Spot clean with Murphy's Oil Soap and water solution using a slightly damp, soft cloth. Wipe dry as needed to avoid water stains.

Painted Surfaces

Spot clean with a soft cloth using non-abrasive, water-based cleaners such as Simple Green (diluted per instructions) or Fantastik.

Do not use: Solvents, abrasive cleaners, steel wool, powder soap, harsh chemicals, acids, or alkaline on laminate, veneer, and painted surfaces.

Acrylic and Frosted Acrylic

Use a plastic specific cleaner, such as Novus No. 1, or warm water and dish soap with a soft cloth. For a diluted bleach solution, mix 1/3 cup bleach per gallon of water. Use a clean soft cloth and apply only light pressure. Test in a inconspicuous area before use.

Warning: Acrylic screens scratch and scuff easily. After removing protective film, carefully install the screen. Do not: remove protective film from acrylic screens, then stack them in a pile or against each other. Experience shows this will cause marring and scratching.

Do not use: Abrasive cleaners, or cleaners that contain ammonia or alkaline-based product (including household cleaners) that will cause crazing.

Cambria® Quartz

Wipe with warm water and use mild soap, if desired. Due to its nonporous nature, Cambria is stain resistant and reduces bacterial growth. Unlike granite, quartz does not require regular sealing, polishing or reconditioning. Bleach cleanable.

Wilsonart® Solid Surface

For day to day cleaning, warm soapy water or non-abrasive household cleaners such as glass cleaner, Fantastik, or commercially available solid surface cleaners will remove most residues. Rinse and towel dry the surface to prevent spotting, especially in areas with hard water.

KrystalCast®

Use a dish soap and water mix—in a spray bottle—with a Green Scotch Brite 3M scrub pad to clean and loosen all dirt and goo (including oil and wine stains, etc.), then dry with a clean dry towel.

Textiles

Use a vacuum on the textile as needed. For deep stains, fabric may be cleaned with mild water-free solvents, water-based cleaning agents, or foam. Test cleaner on an inconspicuous section of fabric before use. For COM textiles, follow manufacturer's cleaning recommendation. High Performance Textiles are bleach cleanable.

Heavy-Duty Multi-Ply Cardboard

May be cleaned with a disinfectant or a light spray.

Acoustic PET Material

Cleanable with bleach solution and other disinfectant sprays and cleaners. Test on inconspicuous area before use.
