

Gesture seating

Gesture<sup>™</sup> is the first office chair designed to support a greater range of technologies, postures and user sizes.

Inspired by the human body, designed for the way we work today.

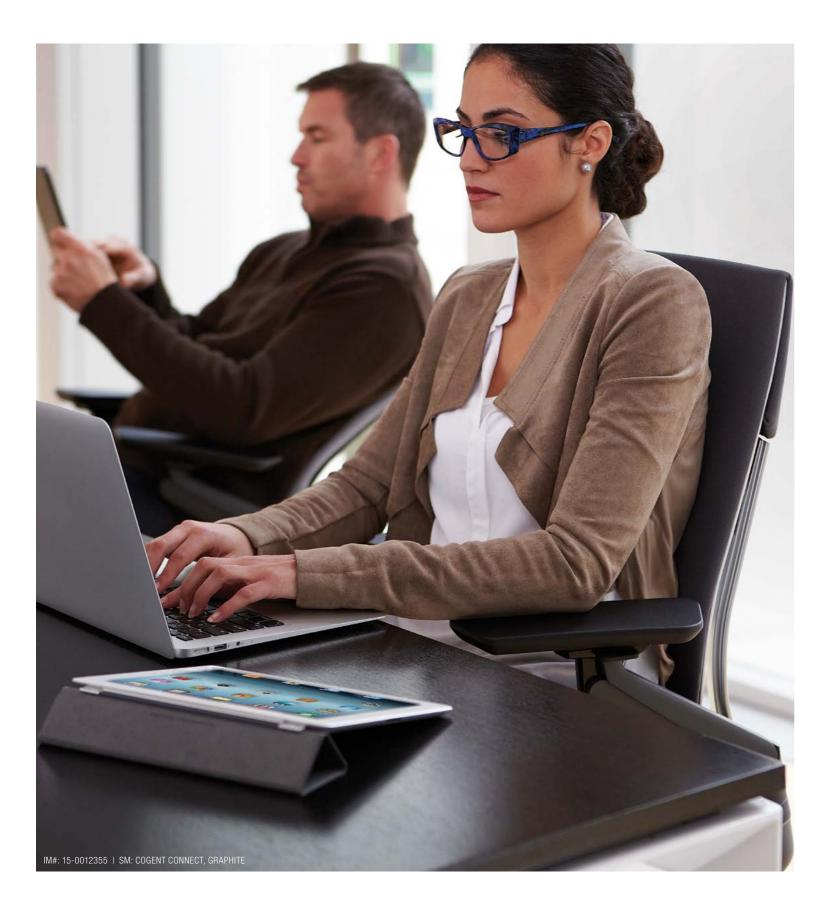

The global posture study revealed new, unhealthy technology-driven postures.

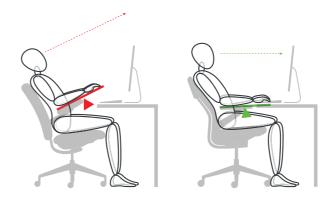

## **Global Posture Study**

To better understand the body at work, Steelcase conducted a global posture study spanning **six continents** and more than **2,000 participants**. We discovered that changes in technology and behavior have led to new unhealthy postures that are not adequately supported by current seating solutions. While technology boosts productivity, it can cause discomfort that disrupts our work, our ability to concentrate and our creativity.

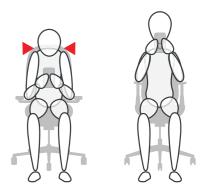

# Greater Range of Technologies

The Gesture 360 arm moves like the human arm, while supporting users in any position. Most people use an average of three devices a day, and Gesture supports movement and healthy postures between devices when interacting with technology.

SUPPORTING HEALTHY MOVEMENT Gesture allows healthy movement and postures like reclining without pulling users away from their work.

### SUPPORTING MOBILE TECHNOLOGY

Gesture's supportive design helps prevent tech neck-an increasing health issue in the workplace. Highly adjustable arms enable users to bring small mobile devices in close and up to eye level, avoiding awkward and unhealthy postures.

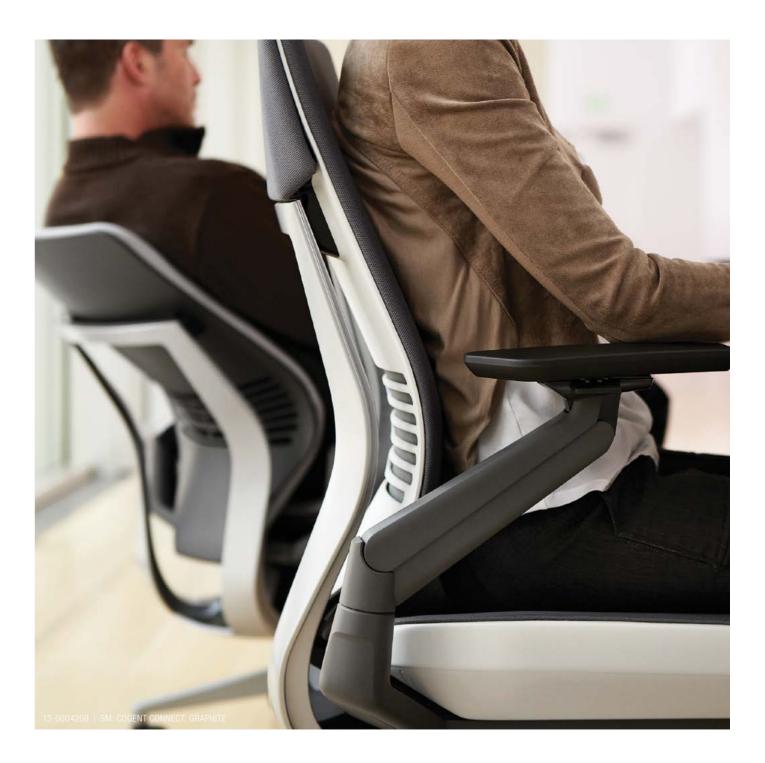

## Greater Range of Postures

With 3D LiveBack, Gesture automatically adjusts to mimic natural spine movement, contouring to the user's back in all postures. It is designed as a system of synchronized interfaces, supporting a greater range of postures through the back, the seat and the arms.

The placement of the arms toward the back of the chair and the soft seat edges allow for comfortable alternative postures.

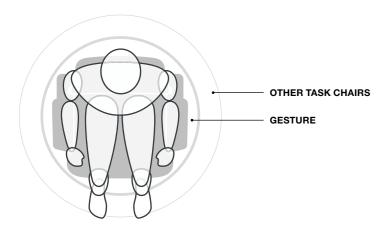

**SUPPORTING THE LOWER BACK** Gesture conforms to a user's back, preventing unhealthy postures that result from a lower back gap.

## **Greater Range of User Sizes**

Gesture solves for the broadest range of user sizes with an extended tension range, arm width, and a wider-than-average seat featuring adaptive bolstering to fit a user's unique size. Regardless of body type, Gesture promises personalized comfort in one simple solution, all in a smaller footprint.

Gesture uses 33% less space, on average, than other task chairs, helping organizations maximize their real estate.

### EASILY DISCOVERABLE. IMMEDIATE FEEDBACK.

Two intuitive, easy-to-operate controls respond immediately to the user's adjustments. The front knob controls seat height and depth, while the back knob controls tension and variable back stop.

#### SUSTAINABILITY

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.

level® 3 Certified to ANSI/BIFMA e3 Sustainability standards

### SURFACE MATERIALS

Digital surface material images are provided as a preliminary color reference and should not be used for final color selection. When Cogent Connect or 3D Knit are chosen, matching material is visible through the chair back. For all other upholstery, black will be visible.

#### DIMENSIONS

Overall depth	533.4 - 600.1 mm
Vidth	568.3 - 879.5 mm
leight	997 - 1123.9 mm
eat depth	463.6 mm
unctional seat depth	400.1 – 470.0 mm
Ceat width	508 mm
eat height from floor	406.4 - 533.4 mm
Back width	412.8 mm
Back height from seat	611.2 mm
Back lumbar height	235 mm
umbar flex zone	101.6 mm
Vidth between arms	260.4 - 571.5 mm
rm to floor	593.7 - 830.3 mm
rm height from seat	184.2 - 292.1 mm
rm cap pivot range	15° inward/outward
eat pan angle	1°
ngle between seat and back	98° to 116°

Love how you work.
